

Astral Power is proud to partner with Cameron Ministries to raise money for the organization while we spread the word about Community Solar. When someone hears about Astral Power and signs up for Community Solar with Cameron Ministries' help, Astral Power will donate \$100 to Cameron Ministries. We understand how difficult it can be to juggle fund raising while serving your community members, and we want to help defray some of your financial burden. By simply spreading the word about sustainability, renewable energy, and Community Solar, we can help strengthen Cameron Ministries.

Community Solar a state program that is aimed at reducing our carbon footprint, and seeks to replace fossil fuel generated electricity with renewable energy. Community Solar is a simple way to **save money** with solar, without directly installing solar panels on your property. Community Solar benefits people who cannot install panels on their homes due to shading or structural issues. It also allows renters and people who cannot afford to pay for solar up front, or do not have sufficient taxable income to take advantage of the tax credits which the Federal government and the state of New York use to subsidize solar installations
